Dear Sir:

Mr. Gillingham has just written me that you might like to buy some of the boxes we use to contain our coins. These were made for us by James T. Clarke, 38 Charles Street, Jamestown, New York, and how small a quantity he would make I cannot say. We get them in about a dozen different sizes and the only ones of which we have a surplus would be the dollar size. I am sending you samples of boxes that hold the dime and small cent size, the quarter or large cent size, and the dollar size. We could sell you possibly a few hundred of the dollar size at three cents each, but not of the others.

Very truly yours,
